NEW STAINED GLASS WINDOWS

Creativity of design stimulates the flight of the imagination into the realm of God's creation, our universe. The positive connections that people make between their church experience and the stained glass art is an important part of a tradition that we strive to incorporate into every project. Whether the window is festive or somber, joyous or serene: O'Brien Stained Glass will always impart the careful attention to detail and craftsmanship that makes the window you want for your church. Our stained glass windows are built and installed to last a long, long time.

Feeling blue? Below are two windows flanking the altar area at Hilltop UMC, Mankato, MN.

If the space calls for a disposition that is a bit more sunny, then the Easter window from Messiah Lutheran Church, Charles City, IA might prove more fitting.
